SAVE WATER OUTSIDE

- Reduce irrigation when weather is cloudy, foggy, cool or rainy.
- Set sprinkler controller to water in early morning and only 2 days per week.
- Remove or reduce the size of the lawn.
- Plant drought tolerant trees, shrubs, and plants.
- Use porous pavement and hardscapes.
- Collect rain runoff into a rain barrel.
- Add mulch to trees, shrubs, and gardens.
- Install drip irrigation systems.
- Turn off all irrigation in the winter.
